REMANUFACTURED
quality · value · reliability

Introducing... **Emerald Certified MFPs** (multifunction products) from Sharp. An extension of the **quality, dependability, and integrity** that define The **Sharp Experience**.

Only machines that have undergone **Sharp's extensive remanufacturing process** and meet the highest standards earn the badge of **Emerald Certification**, a symbol of **quality, value, and reliability**.

What is Emerald Remanufactured?

An **Emerald Certified MFP** is not a used machine or even a refurbished machine. Used and refurbished machines are full of hidden risks – old, used parts of unknown quality and age – that can result in unexpected downtime and repairs.

What is Emerald Certified?

At our exclusive remanufacturing facility, our technicians are driven to exceed our customers' high expectations.

They clean every inch of the machine to ensure that the MFP looks and performs like it's straight from the factory.

Skilled technicians also clean every trace of data from the machine, so your MFP gets a fresh start.

Technicians then rebuild the machine from the frame out using genuine parts and following a precise system of stages and checks. Old parts are recycled through FCM Recycling Solutions.

The completely remanufactured MFP is then ready for its final inspection, a rigorous set of tests and validation checks. When the machine is approved, it earns the stamp of Emerald Certification. Look for it to ensure the MFP you choose is the highest quality.

Every Emerald Certified MFP has been cleaned, and then entirely rebuilt to the highest standards using Sharp genuine parts.

An **Emerald Certified MFP** is a remanufactured machine that is inspected, cleaned, and then entirely rebuilt to Sharp's factory warranty specifications using genuine parts. A rigorous system of checks and inspections governs every stage of this process. The result is a MFP of unsurpassed quality and reliability. That means more productive uptime.

Recycle - The Emerald Process upholds the highest standards in environmental responsibility. No hardware ever goes to a landfill or for illegal export. We ensure that all components are recycled through Canada's premiere recycling company, FCM Recycling Solutions (ISO 9001:14001 & OHSAS 18000), which employs industry leading, environmentally sound technologies. For more information regarding FCM Recycling Solutions, please visit www.fcmrecycling.com

The **Sharp Experience**. The promise of a **rewarding and friendly experience** through every member of our team. We will remain **accountable for your business** always. We will **treat you as friends** should, with **trust, dependability, accountability, and flexibility**.
